

## October 11 – College Park, MD

Everyone slept in this morning, and we woke up to a lovely 70 degree day. We met Bill and Anne for lunch at [Busboys and Poets](#) in Columbia, the service left a little to be desired, but the food was excellent. Columbia is a growing community and is beautifully maintained with lots of green spaces and an active young person vibe.

We all took a hike around the lake in [Centennial Park](#). Just a lovely park! We spent the rest of the day just visiting before [Jupiter](#) was visible. Bill took this picture showing 4 moons around Jupiter.
